	F. Conclusion	
21.	Some Practical Examples showing how the Creation of Money and Operation of Monetary Systems can be worked with Otherwise	89
22.	Some Recent Developments	93
23.	Doing it otherwise: “The Just Monetary System”	97

PRELUDE by the AUTHOR

The Author John Offenbach is a visionary and lawyer who has studied and analyzed the current fiat-money monetary system for over 15 years.

“First, I want to show my deep acknowledgment to the many people, especially researchers and those brave people who risked their lives for exposing the issues and flaws of the current fiat-money monetary system. They helped me understand and discover the outrageous atrocities set up by the current fiat-money monetary system and the consequences that were inflicted on Humanity and the World.

I have made it my mission to address and resolve this disgrace because of the obvious outcry and longing of Humanity for a New and Just Monetary System. Thank you all.

The analysis made me understand that the way how money is created via the current monetary system is not only unlawful and a fraud, but also totally unnecessary.

It also made me focus on creating a New and Just Monetary System referred to as “[The Just Monetary System](#)”, presented through its website. It is intended as a contribution to the World to provide a way out of the current monetary system and a way to transition into a New and Just Monetary System.

The New Just Monetary System is an alternative system that is Just, Sound and Self-less. The current unjust system enslaves humanity, is falsely out of touch, misleading, casino-like in the way how it unnecessarily drains the economy for the benefit of select manipulating groups, and is based on an irrelevant and hallucinated sophisticatedness. It simply needs to be abolished.

The alternative I have been working on outlines The Just Monetary System as a Template and shows how it can be operated so it can bring Goodness to Humanity, to the Nations of the World and the monetary systems they apply”.
